Executive Summary

- 25+ years building and modernizing enterprise software platforms, spanning high-scale SaaS, manufacturing systems, cloud architecture, and AI-enabled development.
- Architected high-scale commerce and kiosk systems handling millions of prints annually across 10+ countries and approximately $1B in annual sales at peak.
- Led and mentored teams of up to 10 developers, championing modern engineering practices and AI-assisted development.

Professional Experience

Staff Engineer | Kardium

Vancouver, BC | March 2026 - Present

- Helped architect an Azure-hosted modernization of the manufacturing execution system (MES), transitioning from legacy desktop applications to a platform based on Microsoft Dynamics 365, Siemens Opcenter, and supplemental applications, designed to support approximately 100× manufacturing growth.
- Developed label-printing tools for proofing, printing, reprinting, and auditing hundreds of label formats, integrating inputs from multiple systems and supporting hundreds of printers.
- Built an agentic RAG-based Ticket Tool in the first two weeks, helping support staff and developers troubleshoot dozens of legacy MES, PLM, and inventory applications using knowledge bases, runbooks, source code, requirements, and tool-assisted access to source code and read-only database information; widely adopted by support staff.
- Developed an invoice reconciliation tool that matches uploaded invoice documents with PRs in the inventory system to address unreliable inventory costing data.
- Replaced manual Azure deployment procedures with automated Azure DevOps Pipelines and Terraform to manage application releases.
- Championed AI adoption across MES development by creating reusable skills and plugins used by colleagues, while contributing technical architecture, guidance, and mentoring.

Director of Software Development | Storefront.com

Vancouver, BC | August 2020 - July 2025

- Owned end-to-end development of a React/Node.js mobile photo upload and payment app, allowing customers to transfer photos from phones to kiosks via a barcode and pay for kiosk purchases on their devices.
- Co-architected PrintSuite, a distributed C# microservices SaaS platform for customizable products and e-commerce integrations using Solace event messaging, Shopify, and other commerce platforms.
- Delivered PixMoments for FujiMexico and Telcel, reaching 500,000 devices; helped scale the e-commerce backend for thousands of connected devices.
- Managed and mentored up to 10 developers, creating career paths and developing future technical leaders.

Professional Experience (continued)

Team Lead / Senior Software Architect | Storefront.com

Vancouver, BC | January 2010 - July 2020

- Led architecture and launch of an Android photo kiosk built with Vue/TypeScript and Java/Kotlin/C# services, doubling engagement and revenue.
- Architected remote management for 30,000+ kiosks, lab systems, and printers, delivering monitoring, remote access, scheduling, and error reporting at 12,000 requests/minute.
- Enhanced Storefront e-commerce and administrative tools to streamline retailer operations, support adoption, and improve the customer experience.

Senior Software Developer | Storefront.com / Macdonald Harris and Associates

Vancouver, BC | December 1998 - December 2009

- Architected a photo e-commerce platform launched in 2000 and still operational, serving 10+ major retailers including Rite Aid, Costco Mexico, and London Drugs.
- Led architecture of the Windows photo kiosk, processing millions of prints annually and supporting over $1B in photo product sales at its 2010 peak.

Programmer | Canadian Forest Products (Canfor)

Vancouver, BC | Mar 1998 - Dec 1998

- Developed a Visual Basic system for importing, cataloging, and displaying Material Safety Data Sheets (MSDS), replacing a multi-binder paper process with a searchable digital platform accessible from terminals across all Canfor operations, improving compliance and retrieval times.

Technical Skills

Frontend: TypeScript, JavaScript, React, Vue, Blazor, Angular, HTML, CSS; complex build systems (Vite, Webpack, Rollup, Gulp), experience with websockets and PWAs.

Backend: Node.js, C#, PHP, Python. Experience with message buses (particularly Solace) and EDA (Event Driven Architecture) as well as designing Rest APIs and GraphQL.

AI / Machine Learning: Hugging Face Transformers, PyTorch, OpenCV, Scikit-learn, LangChain, LangGraph, n8n, ChromaDB, fine-tuning LLMs (through Lora/QLora), AI-assisted coding tools and AI-assisted development.

DevOps & Infrastructure: Azure, Docker, Kubernetes, AWS, Terraform, CI/CD (Azure DevOps Pipelines, GitHub Actions, GitLab CI, Jenkins), Open-Auth (Keycloak)

Mobile: Android (Java, Kotlin, Jetpack Compose), iOS (Swift, SwiftUI), cross-platform (ReactNative, Flutter, Cordova)

Databases: MySQL, SQL Server, PostgreSQL, SQLite, MongoDB, Redis.

Education

Langara College | Vancouver, BC | 1995 - 1998

Advanced Computer Studies and Technology Program (ACST)

University of Western Ontario | London, ON | Graduated 1993

Honours BA in English Literature
